

# what is html

html is a markup language(HYPER TEXT MARKUP LANGUAGE)

html is the standard mark up language for creating web pages

## create a table in html

tr>		
Student name	class	mark
athira	4	90
anuvind	4	97
kiran	8	97

## Ordered list

An ordered list can be numerical or alphabetical. The list items will be marked with numbers by default:

1. Tea
2. coffee
3. juices

The type attribute of the tag, defines the type of the list item marker:

- i. tea
- ii. coffee
- iii. milk

## unordered list

- fruits
- veggies

The list items will be marked with bullets (small black circles) by default:

## forms

An HTML form is used to collect user input. The user input is most often sent to a server for processing.

enter email

enter password

## self closing tags

A self-closing tag is an element of HTML code that has evolved in the language. Typically, the self-closing tag makes use of a “/” character in order to effectively close out a beginning tag enclosed in sideways carets. br ,hr

## how to embed a video

- **video:**tag used to embed video
- **src:**to give the path of video
- **controls:**to make the video play
- **poster:**used to add thumbnail
- **width,height:**adjust width and height

## html attributes

HTML attributes are special words used inside the opening tag to control the element’s behaviour. HTML attributes are a modifier of an HTML element type. An attribute either modifies the default functionality of an element type or provides functionality to certain element types unable to function correctly without them. In HTML syntax, an attribute is added to an HTML start tag.  
example  
**style attribute** (height and color)  
**style attribute** (height 60 and color violet)

**The href attribute in HTML** The href attribute is the main attribute of **anchor tag** This attribute gives the link address which is specified in that link. The href attribute provides the hyperlink, and if it is blank, then it will remain in same page. [This is a link for google](#)

**The src Attribute** The src attribute is one of the important and required attribute of **img** element. It is source for the image which is required to display on browser. This attribute can contain image in same

directory or another directory. The image name or source should be correct else browser will not display the image.
